

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A ~~printing and display device~~ monitor for connecting to an external computer, the monitor comprising:

a. ~~—~~ a flat panel display for displaying image data provided by the external computer;

b. ~~—~~ a ~~printer, including~~ a pagewidth inkjet printhead for printing print data provided by the external computer onto paper;

e. ~~—~~ a multi-sheet paper holder for holding multiple paper sheets;

d. ~~—~~ a paper sheet separator configured to separate a single paper sheet from the paper sheets in the multi-sheet paper holder for supply to the pagewidth inkjet printhead[[.]],
and

a paper feed mechanism for feeding the single paper sheet to the pagewidth inkjet printhead for printing.

2. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1 wherein a viewable size of the ~~printing and display device~~ monitor exceeds 40cm measured along a diagonal of the monitor ~~printing and display device~~.

3. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, ~~wherein the printer includes~~ comprising at least two ~~the~~ printheads, the printheads being disposed on either side of a path through which ~~print media~~ the single paper sheet is fed for printing, thereby enabling substantially simultaneous printing of both sides of the ~~print media~~ single paper sheet.

4-9. (Cancelled)

10. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim [[8]] 1, wherein the paper feed mechanism is configured to position the paper substantially parallel in at least one direction with respect to a plane defined by the flat panel display.

11.-12. (Cancelled)

13. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, wherein the ~~printer~~ printhead is a process color ~~printer~~ printhead.

14. (Cancelled)

15. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 13 ~~1~~, wherein the ~~printer~~ printhead has more than 5,000 inkjet nozzles.

16. (Cancelled)

17. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, wherein the flat panel display measures at least 14 inches on the diagonal.

18. (Cancelled)

19. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, configured to enable printing of standard A4 or Letter sized sheets of paper.

20. (Cancelled)

21. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, further including a curved paper guide disposed, when the ~~device~~ monitor is in use, beneath the flat panel display, such that the paper that has been printed is urged horizontally as it exits the ~~device~~ monitor.

22. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, wherein the flat panel display is of one of the following types:

Liquid Crystal Display (LCD);

Organic Light Emitting Diode (OLED);

Field Emission Display (FED); and

Plasma Display Panel (PDP).

23. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, wherein the printhead is configured to receive halftoned print data to be printed onto the ~~print media~~ paper.

24. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, further including a halftoning unit for generating halftoned image data and supplying ~~it~~ halftoned image data to the printhead for printing.

25. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, wherein the printhead is configured to print photographic images.

26. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1, wherein the printhead is configured to print image and text data.

27-28. (Cancelled)

29. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1 further comprising:

~~a flat panel display for displaying images from a computer; a stand for holding the flat panel display in an operative position; and a printer, the printer including a printhead for printing onto paper; wherein the stand includes~~ including at least one receptacle configured to accept at least one replaceable ink cartridge for supplying ink to the ~~printer~~ printhead.

30. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1 further comprising:

~~a data connection for receiving print data from a computer; a flat panel display for displaying images received from a computer; a printer, the printer including a printhead for printing onto paper on the basis of the print data; and~~

a data connection hub configured to allow connection of at least one data-receiving device to the ~~printing and display device~~ monitor, enabling the data-receiving device to receive data from the external computer.

31. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1 ~~wherein further comprising:~~

- ~~—— a flat panel display; and~~
- ~~—— a printer, including a printhead for printing onto paper;~~
- ~~—— the device being configured such that, during printing, the paper sheet being printed onto passes between the flat panel display and the printhead, or passes behind the flat panel display and the printhead relative to a viewing position of the flat panel display.~~

32. (Cancelled)

33. (Currently amended) A ~~printing and display device~~ monitor as claimed in claim 1 ~~further being configured to receive documents to be printed from a computer system, the printing and display device including an interface for connecting to a computer system, and being configured to:~~

- receive, via the interface, input from a user indicative of a print command;
- ~~send, from the printing and display device~~ to the computer system, a print request;
- receive, from the computer system and in response to the print request, a document to be printed; and
- print the document.
